VANGLAM Color System · Global Core 32

32 core colours in four display groups with HEX, RGB, Lab and CMYK references. Digital values are references; spectrophotometer readings confirm colour.

Reading the values

— Lab: D65 illuminant, 10° observer, converted from the digital reference.

— CMYK: FOGRA39 coated, for layout proofs only.

— VANGLAM Color System 40 is the overall framework; SOFTSKIN and CHROMA each have 25 colours, not additive. Availability is confirmed by collection.

— Production tolerance is agreed in writing against the signed Master Sample.
