A MATERIAL SELECTION GUIDE

Material Overview

材料选用概览

从白色、颜色到珠光、触感与原料。九个系列，为品牌、设计与生产建立共同的选纸起点。

From white tone and color to pearlescence, touch and raw material. Nine collections give brands, designers and production teams a shared starting point.

编辑概念图 / Editorial concept
非实物纸样或性能证明
Not a physical sample or test evidence.

VANGLAM 以颜色、纸面与触感组织材料选择。齐力纸业将选材连接到制造、打样、印刷适配与项目交付。

VANGLAM brings color, surface and touch into material selection. QiLi Paper connects that choice to manufacturing, sampling, print trials and project delivery.

BRANDS / DESIGNERS / PRINTERS & CONVERTERS

01 / SELECTION FRAMEWORK

从材料开始

Start with the material

四个材料家族提供选择方向；PERFORMANCE 与 LAB 分别承接技术筛选和项目开发。

Four material families guide selection. PERFORMANCE and LAB provide technical and project entry points.

01 ESSENTIALS

基础材料

先比较白色、底色与纸面，建立印刷和品牌表达的基础。

Compare white tone, base color and surface as the starting point for print and brand expression.

02 EFFECTS

光效材料

让光泽参与设计。观察正面与斜光下的反射，再确认文字与图像表现。

Use sheen as part of the design. View reflections head-on and at an angle, then assess type and imagery.

03 TOUCH & TEXTURE

触感与纹理

比较手感与纹路，并在折线、胶位和加工部位检查纸面表现。

Compare feel and texture, including the surface at folds, glue areas and finishing details.

04 EARTH

天然与环保

按具体纸款选择再生或植物原料路线，核对对应材料说明。

Choose recycled or plant-based material routes by individual grade, with its supporting information.

TECHNICAL & PROJECT ENTRY POINTS

05 PERFORMANCE

功能材料 / 技术筛选

按印刷、折线与后加工要求筛选纸款。

Filter by printing, creasing and finishing requirements.

06 LAB

定制与创新

从项目目标出发讨论材料与定制开发。

Develop a material brief around the needs of the project.

02 / NINE COLLECTIONS

白色、颜色与珠光

White tone, color and sheen

01 IMPRINT 素印

白色印刷纸。素映为未涂布分支，含 7 种白色层次；细映为涂布分支。先看白色与纸面，再在选定纸款上确认图像、细字和加工表现。

White printing papers, with an uncoated branch offering seven white tones and a separate coated branch. Compare tone and surface, then proof images, fine type and finishing on the chosen stock.

02 PALETTE 色序

40 色彩色未涂布纸，纸面与纸芯同色。先以实纸组合品牌配色，再确认切边、折线与印刷后的整体效果。

40 colors of uncoated paper, with matching surface and core color. Build the palette with physical samples, then review cut edges, folds and the printed result.

03 HALO 皓光

5 款白色珠光纸。比较白色倾向、反射与印刷后仍需保留的光泽。不同纸款的干燥与后加工表现分别打样确认。

5 white pearlescent grades. Compare white tone, reflection and the sheen to retain after printing. Verify drying and finishing for each selected grade.

冰魄 · 霓曜 · 熙瓷 · 云贝 · 暖瓷

Glacial White · Prism White · Ivory Silk · Nacre White · Warm Porcelain

04 CHROMA 彩曜

25 色彩色金属珠光纸。将底色与金属光泽一起选定，再用同一纸款确认印墨、烫金与折后外观。

25 colors of metallic pearlescent paper. Select base color and metallic sheen together, then check ink, foil and folded appearance on that stock.

样册用于筛选，选定纸款的实物样与加工样用于确认。

Use a sample book to shortlist; use physical stock and process proofs to approve.

03 / NINE COLLECTIONS

触感、纹理与原料

Touch, texture and raw material

05 SOFTSKIN 凝肤

全系列 25 色，设 Classic 与 PRO 两档。Classic 轻柔顺滑，不防手印、不耐脏；PRO 带丝绒感与轻微阻尼。具体颜色与档位组合按纸款确认。

25 colors across the range, in Classic and PRO tiers. Classic feels soft and smooth, without fingerprint or stain resistance. PRO has a velvet feel and subtle drag. Confirm the color and tier combination.

06 PEARLSKIN 珠缎

触感油与超细珠光粉结合，让手感与珠光同时参与设计。用实纸在斜光下观察光泽，并测试拟用印刷与后加工。

A tactile coating with ultrafine pearlescent powder brings feel and sheen together. View physical samples in angled light and test the intended printing and finishing.

07 GRAINFORM 织构

彩色全木浆原纸压纹纸。选择具体纹样后，检查细字、烫金边缘及折线处的纹理表现。

Embossed paper on a colored all-wood-pulp base. Select the actual texture, then check fine type, foil edges and the texture across folds.

08 晶釉 镜面高亮效果纸

25 色，平滑镜面高光。表面耐水限于短时间接触。项目另行确认折线、胶黏及实际使用条件。

25 colors with a smooth, mirror-gloss surface. Surface water resistance is limited to brief contact. Check folds, adhesive choice and intended use conditions.

09 EARTH 再生与植物原料

不同纸款采用回收或植物、农副原料路线，提供粗糙与光滑纸面。按选定纸款核对成分说明与证明文件。

Different grades follow recycled, plant or agricultural material routes, with rough and smooth surfaces. Check composition information and documentation for the selected grade.

04 / VANGLAM COLOR SYSTEM 40

让颜色回到纸上

Choose color on paper

VANGLAM Color System 40 为品牌与纸张选色提供共同参照。PALETTE 自身也为 40 色纸系列；其他系列的颜色与纸款组合需要分别确认。

VANGLAM Color System 40 provides a shared reference for brand and paper color. PALETTE is itself a 40-color paper collection. Confirm color and grade combinations separately in other collections.

品牌签名色 / Brand signature colors

石绿

Mineral Green

#2A826A

秋香

Aged Citrine

#9E8F2E

钴釉蓝

Cobalt Glaze

#244FA3

数字颜色仅供参考。最终颜色须以选定纸款的实物纸样确认。

Digital colors are for reference only. Confirm final color with physical samples of the selected grade.

在材料上比较

将候选纸样并列，在一致光线下比较。转动珠光或镜面纸，查看反射变化；将文字、印墨与烫金放回同一纸面判断。

Compare on the material

Compare physical candidates side by side under consistent lighting. Turn pearlescent or mirror-gloss paper to view reflection changes, then assess type, ink and foil on the same surface.

保留项目确认样

记录纸款、颜色、档位、加工与确认版本。平张、打样和组装后的成品应使用同一项目基准复核。

Keep an approved project sample

Record grade, color, tier, processing and approval version. Use one project reference to review sheets, proofs and the assembled pack.

05 / PROJECT CHECKLIST

从选样到成品

From sample to project

01 说明用途

写清外盒、裱面、封套、卡片或书封，以及接触与使用环境。

Define the use

Identify the carton, wrap, sleeve, card or cover, and its contact and use conditions.

02 选纸与定色

从实纸筛选表面、颜色与手感，确认纸款、档位、克重和完整尺寸。

Select grade and color

Use physical samples to choose surface, color and feel. Confirm grade, tier, weight and full size.

03 做工艺样

按拟用设备、油墨、烫金箔和胶黏剂打样；核对细字、附着、干燥、折线与胶位。

Proof the process

Trial the intended press, ink, foil and adhesive. Check fine type, adhesion, drying, creases and glue areas.

04 确认成品样

由品牌、设计与生产共同确认外观、触感和结构，保留标注版本的实物确认样。

Approve the assembled sample

Have brand, design and production teams review appearance, feel and structure. Keep a versioned physical approval sample.

项目沟通请附：用途与部件、候选纸款与颜色、数量、完整尺寸、加工清单、目标时间。样册免费，海外运费由收件方承担。

Share the application and component, candidate grade and color, quantity, full dimensions, process list and target timing. Sample books are complimentary; overseas shipping is paid by the recipient.

本概览用于初步选材，不替代逐款技术资料或项目打样。具体供货组合、规格及认证与合规文件按材料和项目确认。

For initial material selection; this guide does not replace grade-specific technical information or project trials. Confirm availability, specifications and compliance documents by material and project.
